Experience

EfficaSafe - UX/UI Designer (Intern) Feb 2026 - Present

- Executing the entire UX process, from initial research and paper wireframes to interactive prototypes and usability testing.
- Developing a specialised online store widget for platforms like Amazon and iHerb, focusing on high-clarity information architecture for sensitive product categories.
- Designing within strict industry guidelines to ensure all interface elements remain professional, accurate, and aligned with sector-specific standards.
- Collaborating closely withdevelopers to ensure design feasibility, precise component handoff, and consistent implementation.

Game Story - Lead Product Ops & Interaction Designer Jun 2021 - Present

- Managing international cross-functional teams to deliver weekly product updates, overseeing the design lifecycle from concept to final delivery.
- Transforming static UI into dynamic, interactive experiences by designing smooth motion transitions and natural feedback loops.
- Auditing all UI interactions and animations to ensure they meet high-quality usability standards and accessibility requirements.

Projects

‘Kindred’ - B2B Food Donation App - UX Designer Jan - Feb 2026

Designed an end-to-end mobile solution to streamline surplus food management for business owners, focusing on high-efficiency workflows and accessible design for fast-paced environments.

‘Quantex’ - Digital Wallet For Travellers - UX Designer Dec 2025

Developed a wallet app and responsive website for international currency management, prioritising user trust and accessibility to ensure a seamless financial experience across multiple platforms.
